

Decision Making for Typesetting

1 T_EX Decision Making

The show switch is false.

1.1 Conditional New Command

This will be the output when the *form* switch command is on -true- .

When we turn it off this will be the output -false- .

2 The ifthen Package

2.1 Basic Usage - Boolean Switch

Italic Output

Content of true boolean test Content of false boolean test

2.2 Comparing Strings Test

This is a bold text

This is an Italic Output

2.3 Comparing Numbers Test

This is a Bold Text , and this is an *Italic Text*

2.4 Comparing Lengths Test

Dimension is Wrong

2.5 The isodd Test

This is an Odd Page

This is an Even Page

2.6 Check if undefined

Content for New Command

The requested macro already defined, and here is it's body: **Content for New Command**

This page is Odd

2.7 Logically Adjusting Tests

This is an Odd Page

This is an Even Page

2.8 Combining Tests

The boolean *ruled* is true, but [This is an Even Page](#) that's why the rule is blue.

This page is Odd

Now the rule is red

Because - This is an Odd Page and boolean *ruled* is true.
